170070046
UG Final Year
Male
DOB: 07/06/99

Examination	University	Institute	Year	CPI / %
Graduation	IIT Bombay	IIT Bombay	2021	8.02

Awarded **Undergraduate Research Award** (URA 01) for indigenous MRI contribution (2019)

Publications

Improving Single and Multi-View Blockmodelling by Algebraic Simplification

Rishabh Ramteke, Peter Stuckey, Jeffrey Chan, Kotagiri Rao, James Bailey, Christopher Leckie
International Joint Conference on Neural Networks (**IJCNN**) 2020 IEEE WCCI, Glasgow (UK)

- Extended Blockmodelling to incorporate multiple sources of information including multiple edges and node features which improved on the state of the art for various real datasets
- Devised new, efficient approaches to perform **pareto based optimisation** based on idea of homophily, that can find groups of nodes that are highly similar in connections and/or attributes
- Conducted experiments to benchmark performance of various architectures against previous work

Work Experience

Research Engineer | Honda R&D Japan

Oct 2021 - Present

Computer Vision for Autonomous driving

Internship Experience

Practical Transfer Learning for Intelligent Robot Programming

Summer 2020

Guide : Prof. David Touretzky | Computer Science Department | **Carnegie Mellon University**

- Employed transfer learning to allow a mobile robot with a low-resolution camera for object recognition from a small number of samples and guide users to construct effective training sets
- Utilized extensive set of transformations to allow reasonable recognition rates for 2D patterns
- Studied the minimal set and type of training samples necessary to achieve good performance on a highly varied test set with various orientations/viewing angles

Clustering white-matter fiber tracts of diffusion MRI

Winter 2019

Guide: Prof. Ramamohanarao Kotagiri | Dept. of Information Technology | University of **Melbourne**

- Devised a novel algorithm for clustering white-matter fiber tracts of diffusion-weighted MRI to generate realistic fiber models for the human brain
- This algorithm outperformed previous state of the art method and is computationally efficient
- Improved the gray-matter region connectivity of the fiber trajectories, which were initially disconnected when estimated from tractography and were discarded in brain connectivity analysis

Simulation of transparent objects for estimating 6DOF pose

Spring 2021

Guide: Prof. Markus Vincze | Automation & Control Institute | Technical University of **Vienna**

- The project involved the topic of recognising semi-transparent objects where we worked on methods to model these objects, study methods that detect and recognise them, and finally contribute to methods that estimate 6DOF pose of objects for subsequent robotic grasping
- Simulated transparent objects and the rendering of realistic scenes in order to create data for learning Mask R-CNN
- Automated the rendering with a python script in blender and parameter study for depth computation

Technical Activities

Attention based Graph CNN for scene classification

Spring 2019

Guide: Prof. Biplab Banerjee | Dept. of Resource Engineering | IIT Bombay

- Classified region adjacency graph representation of images by **spatial graph convolution** networks
- Implemented Attention model in TensorFlow for **better classwise region highlights**
- Obtained **state of the art** results in scene recognition for several aerial datasets

Unsupervised Domain Adaptation with GAN

Autumn 2019

Guide: Prof. Biplab Banerjee | Dept. of Resource Engineering | IIT Bombay

- Implemented the research paper **Unsupervised Pixel-Level Domain Adaptation with Generative Adversarial Networks** on PyTorch
- The proposed method adapts source-domain images to appear as if drawn from the target domain by learning a transformation in pixel space from one domain to other based on GANs
- Outpaced the proposed method's performance by replacing the proposed PixelDA GAN with LS-GAN

Accent recognition | Course Project

Autumn 2019

Guide: Prof. Preeti Jyoti | Dept. of Computer Science | IIT Bombay

- Extracted and refined the Long and Short Term features from the audio data using PCA and HLDA
- Improved the Accent classification by combining phonetic vowels with acoustic features and trained the model using a combination of Deep Neural Networks and Recurrent Neural Networks

Image Reconstruction with MRI technology

Spring 2019

Guide: Prof. V.M.Gadre | Scan Era | Ministry of Communication & Information Technology, India

- Awarded the **Undergraduate Research Award** for this notable contribution
- Implemented a modified version of GRAPPA algorithm on SDK for image reconstruction with parallel MRI technology which would be used in the indigenous state-of-art MRI Machines
- Simulated the algorithm on MATLAB and then implemented it on **Xilinx Zynq-7000 FPGA board**

International Aerial Robotics Competition | AUVSI foundation

Sept 2018 - Jan 2019

Unmesh Mashruwala Innovation Cell | IIT Bombay

- Contributed to control and hardware design of autonomous quadcopters in a **GPS-denied** environment
- Implemented communication between on-board processor Intel i5 NUC, offboard computer and **Pixhawk** for transfer of localization and IMU data using MAVLink communication protocol on ROS
- Utilized **LIDAR** sensors and **Stereo Vision** camera to maintain the current position of the quadcopter
- Investigated optimum PID parameters which enhanced flight stability and performance

Technical Skills

Programming	C++, C, MATLAB, R, Python, JavaScript, Robot Operating System
ML Libraries	TensorFlow, Pytorch, TensorBoard
Other Softwares	AutoCad, SolidWorks, Arduino, Unity 3D, Spice, L ^A T _E X, Adobe Premiere Pro

Positions of Responsibility

Coordinator | Events | TechFest, IIT Bombay

May 2018 - December 2018

Asia's Largest College Technical Festival | 1,75,000+ footfall

- Lead a team of **10+** to organise and monitor International exhibitions, showcasing **30+** world class innovations to more than **60,000** people from all over India
- Assisted in 'SPEAK: Stand to Express', an initiative to promote Mental Wellness in over 8 states through a network of **50+** colleges targeting **7000+** college students

Key Courses Undertaken

Computer Science	Data Structures and Algorithm, Machine Learning, Image Processing, Automatic Speech Recognition, Medical Imaging Physics, Cryptography
Mathematics	Data Analysis & Interpretation, Probability & Random Processes, Calculus
Electrical Engineering	Markov Chain and Queuing Theory, Information Theory & Coding, Signal Processing, Communication, Control Systems, Microprocessors

Extracurriculars

- Completed A1 level **Spanish & German** courses organized by Cultural Council, IIT Bombay (2017)
- Secured **Top 5** position in Segreta 2018, a tech cryptic hunt conducted by Techfest, IIT Bombay
- Instructed two teams of four each to successfully complete a **Bluetooth Controlled Bot**
- Completed a year long rigorous training in **Lawn Tennis** under National Sports Organization
- Mentored a group of students for **Machine Learning** as a part of summer of science program
- Part of the **gold** winning hostel team in inter hostel sophomore cross country run GC
- Volunteered in the **World's largest** beach cleanup campaign at Versova by Afroz Shah
